CLUES

- It's present in food and it's our main source of energy
- Cells need this, to collect the energy from what we've just eaten
- It's the organ that produces insulin
- A disease that stops the body from producing insulin
- Without it, we wouldn't have the strength to do things; we get it from food
- Glucose is, sometimes, called this; we know it as the stuff that sweetens food and drink
- Our body is made up of millions of these
